

Figure 1a shows the XRD patterns of the AEI/CHA composites with different AEI/CHA ratios. The patterns are stacked vertically, with the 0/100 ratio at the bottom and the 60/40 ratio at the top. The x-axis represents the 2 Theta angle in degrees, ranging from 15 to 35. The y-axis represents the Normalized Intensity, ranging from 0.0 to 1.0. The patterns show characteristic peaks for both AEI and CHA, with the intensity of the AEI peaks increasing as the AEI/CHA ratio increases.
